

## Connecting your computer to your TV

### STEP 1. Identify the available ports on your TV.

- 1 You would require a HDMI cable to connect your laptop to your TV.
- 2 Check for available HDMI connections on your TV.
- 3 HDMI cable is highly recommended as it transmits both the audio and video signals to the TV.

### STEP 3. Connecting the TV

- 1 Switch off both TV and the laptop.
- 2 Connect the HDMI cable to the respective slot on the TV which are mostly found on the back / side panel of the TV.
- 3 Once connected, power on the TV first & then the Laptop.

### STEP 4. Settings on Laptop

- 1 Press the source button on the TV remote and choose the HDMI port you plugged your computer in to.
- 2 By default, when you connect a TV to a PC, the same image (mirror image) of your desktop appears on the TV.

### STEP 5. Follow directions to access live stream.
